

FAN CLUB

NEWS

NO 02/23

Dear fischertechnik fans,

the Fan Club thrives on your passion and your commitment to our unique world of building and tinkering.

Your topics, your stories: We want the Fan Club News to reflect exactly what interests you. Send us your topic requests to info@fischertechnik.de so that we can share exactly the content that inspires you. Whether it's fascinating models, technical backgrounds or inspiring fischertechnik projects.

Heroes of the fischertechnik world: Do you know someone who stands out because of their connection to fischertechnik? Perhaps a person who implements innovative projects or has exciting stories to tell?

Your wishes, our mission: Do you have any special models in mind that you have always dreamed of? Any model combinations that you think would be fun for everyone? Let us know!

Your feedback and ideas are crucial to making the fischertechnik Fan Club a vibrant and dynamic place. Thank you for your support and enthusiasm! Keep this also in 2024, we wish you great holidays holidays and a good start to the new year.

*Best regards,
your fischertechnik team*

AWARDED!

CRAZY RIDES

For 20 years, the Federal Association of Toy Retailers, together with a jury of experts, has been awarding the TOP10 toys every year - and of course the new products from fischertechnik can't be missing! **Nominated this year were our two "crazy" construction sets Crazy Rides & Crazy Reactions!**

With **Crazy Rides** you can build your own amusement park! Four different rides bring the action straight to your home - it's full throttle up high and upside down with Freefalltower, Bungee Ball & Co.

Crazy Reactions is the latest addition to the fischertechnik chain reactions family. The three cool models, with which you can build exciting surprise effects and expand them with everyday objects, were not only very well received by the TOP10 Toys jury - the set was also nominated for the German Toy Award and even won in the Play & Technology category!

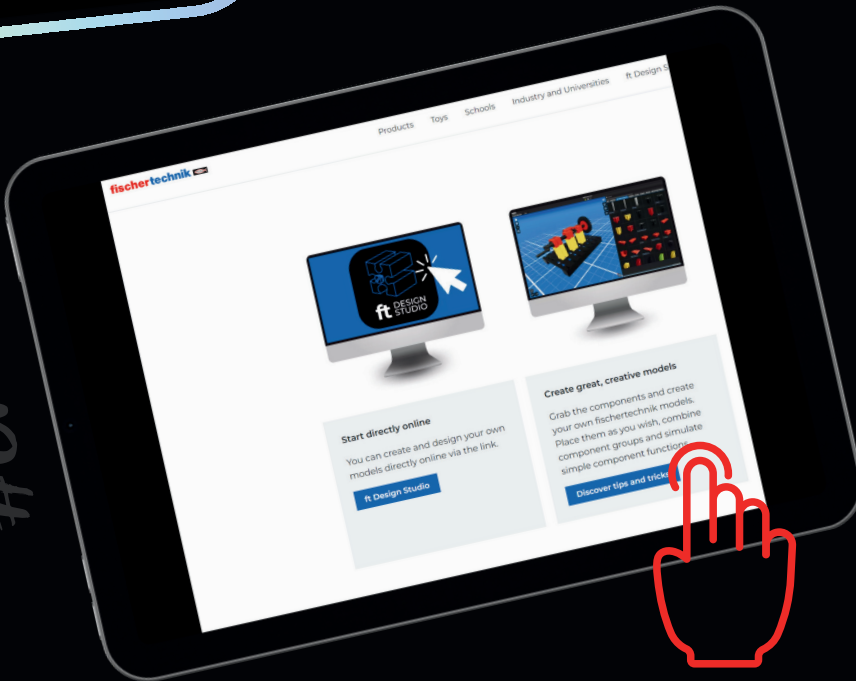

What makes us particularly happy about this award is that it's not just an expert jury that votes on who should win, but also you! Thank you so much for supporting us again in the online voting!

create cool models online, share them and much more!

No time for boredom during the holidays - clear the stage for your creative ideas in the **fischertechnik Design Studio!** Bring your model dreams to life for free in the new, intuitive 3D world and use all the individual fischertechnik parts currently available in the range. Simply log in and off you go!

We have put together some tips and tricks online to help you get started with the Design Studio.

Zoom through the 3D view and marvel at your buildings from all angles.

Capture your masterpieces in photo mode.

TAKE THE OPPORTUNITY TO MAKE YOUR MODEL DREAMS COME TRUE, FIRST DIGITALLY AND THEN FOR REAL! YOU CAN EASILY DOWNLOAD THE LIST OF INDIVIDUAL PARTS THAT YOU HAVE USED FOR YOUR ONLINE CONSTRUCTED MODELS. PICK UP THE PARTS AND GET STARTED!

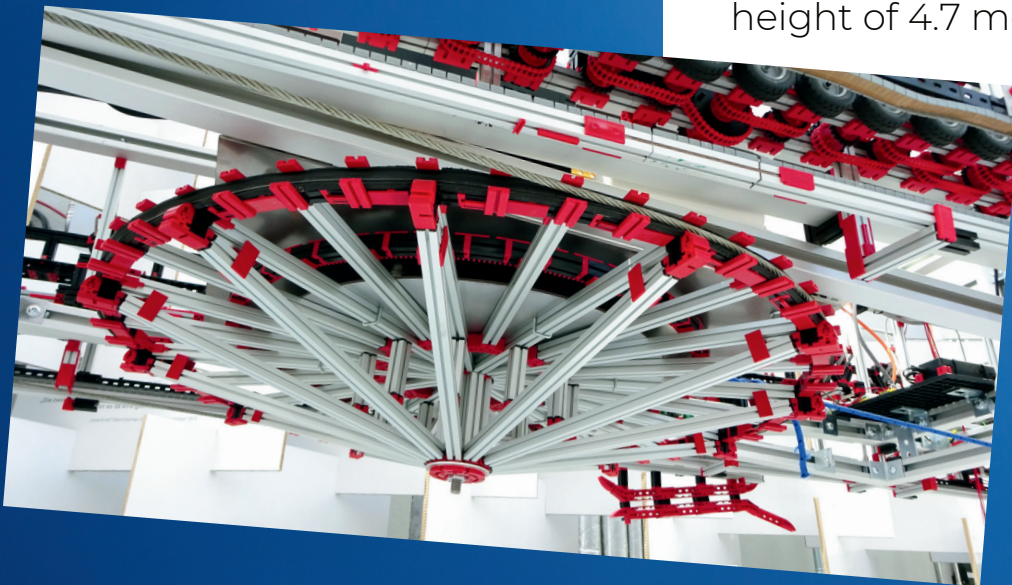

A MASTERPIECE OF TECHNOLOGY

THE FISCHERTECHNIK XXL CABLE CAR

The ambitious fischertechnik cable car project was launched in April 2021 under the leadership of Tilo Rust. The team, consisting of around 20 members of all ages, has invested over 5,000 hours of voluntary work. The goal: to create a fascinating model with an overwhelming 80,000 components.

The impressive cable car now stretches over a length of 21.7 meters and reaches 3.7 meters at its highest support. But the team is thinking even bigger: the final model will have an impressive size of 40 meters with a height of 4.7 meters.

Equipped with its own workshop and control panel, the team not only has the technical know-how, but also the means to realize this ambitious project. Everything, from the components to the technology, can be conveniently loaded onto a Euro pallet or a truck, which underlines the mobility of the project. The partners in the project are fischertechnik, the cable car manufacturer Doppelmayr and the Fördertechnik Museum in Sinsheim.

The most recent achievement of the project was the presentation at this year's Federal Garden Show in Mannheim, where the cable car attracted many admiring glances. Many more exciting impressions here, on the YouTube channel: www.youtube.com/@fischertechnik-seilbahn

The XXL model is currently on display at the Fördertechnik Museum in Sinsheim, where visitors have the opportunity to marvel at this technical masterpiece. A visit there is an absolute must for technology lovers and the curious. Immerse yourself in the world of technology!
